

Abhishek Aman

Mumbai, India — +91 99053 65353 — amn20bhar@gmail.com — GitHub — LinkedIn

Summary

Engineering student specializing in AI/ML and full-stack development with experience building production-oriented applications integrating machine learning models and scalable APIs. Strong foundation in data-driven systems, deep learning, and intelligent application design.

Education

Vidyalankar Institute of Technology, Mumbai Aug 2023 – Nov 2025
B.E. Electronics & Computer Science (AI/ML Honors) CGPA: 7.0/10

Skills

Languages Python, Java, JavaScript
Frontend HTML, CSS
Backend Node.js, Flask, REST APIs
AI/ML Neural Networks, TF-IDF, Sentiment Analysis, Deep Learning (U2Net, ISNet), LLaMA, LangChain
Databases MongoDB, SQL
Tools Git, Postman, Streamlit, OpenCV, NumPy, PIL

Projects

AI vs Human Review Detection System *Python, Flask, Node.js*

- Designed and implemented a machine learning pipeline to classify AI-generated vs human-written reviews using TF-IDF vectorization and sentiment-based feature engineering.
- Built RESTful APIs using Flask and integrated a frontend interface enabling real-time inference.
- Improved classification reliability by combining textual and metadata-based features.

AI Background Remover (Image & Video) *Python, OpenCV, Deep Learning*

- Developed an AI-powered background removal system using U2Net/ISNet models for high-precision foreground extraction.
- Integrated OpenCV and NumPy pipelines to support both image and video processing workflows.
- Designed an interactive UI using Streamlit for real-time user interaction and visualization.

Leadership & Work Experience

Sevika (Home Services) - Software Engineer Intern Apr 2026 – Jun 2026

- Developed **Sevika**, a full-stack home services marketplace using **Next.js, React, TypeScript, Tailwind CSS, and Supabase**, enabling customers to connect with verified service professionals through a modern and scalable web application.
- Implemented secure authentication and worker onboarding workflows using **Supabase Authentication**, including user registration, login, worker profile customization, responsive UI components, and API-driven user interactions.

RAG Engineer — Internal SIH Nov 2025

- Built a Retrieval-Augmented Generation (RAG) system using LLaMA, LangChain, and Ollama for offline-first intelligent querying.
- Implemented conversation memory and intent classification to improve contextual response generation.
- Integrated external APIs for dynamic knowledge augmentation while maintaining privacy-focused architecture.

Team Lead — Ideation VIT Sep 2025

- Led development of a startup concept addressing student relocation challenges, including housing discovery and peer networking.
- Coordinated cross-functional efforts to design solution architecture and user experience.

Event Coordinator — VERVE 2025 Feb 2025

- Managed logistics and operations for a large-scale college cultural festival involving multiple teams and schedules.

Certifications

SQL and MongoDB — CDAC, Mumbai	June 2025
API Fundamentals Student Expert — Postman	Mar 2025
Introduction to Soft Skills — TCS iON	Jan 2024
